

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS

1. (original) A method for generating a plurality of templates, wherein said templates are utilized in building user customizable documents, wherein said templates are comprising sections, sub-sections and fields, said method comprising the steps of:

- a) storing said plurality of templates;
- b) displaying a list comprising said plurality of templates for selection by a user;
- c) retrieving said selected template from said storage, subsequent to the receiving of a user selection of a template; and
- d) displaying to the user said selected template, wherein said selected template enables a user to select said sections, sub-sections and fields for inclusion in a particular document to be built, and said selected template enables a user to select the sequence of said sections, sub-sections, and fields in said particular document to be built.

2. (original) The method as recited in Claim 1 wherein said step a) further comprises the step of:

storing of content, said content selectable subject matter for inclusion in said customizable document.

3. (currently amended) The method as recited in Claim 1 ~~2~~ wherein said step b) further comprises the step of:

displaying lists comprising said content for selection by a user.

4. (currently amended) The method as recited in Claim 1 ~~2~~ wherein said step c) further comprises the step of:

retrieving ~~said~~ selected content from said storage, subsequent to receiving of a user selection of content.

5. (currently amended) The method as recited in Claim 1 ~~2~~ wherein said step d) further comprises the steps of:

separately displaying to the user ~~said~~ selected content, wherein said selected content will comprise the subject matter of the sections, sub-sections and fields of said particular document to be built.

6. (currently amended) The method as recited in Claim 1 ~~2~~ wherein said sections, sub-sections, and fields of said selected template are relative to said subject matter of ~~said~~ selected content.

7. (original) The method as recited in Claim 1 further comprises the step of:

e) displaying to said user a new template reflective of said user selections regarding said inclusion and said sequence of said sections, sub-

sections, and fields of said particular document, subsequent to receiving said user selected sections, sub-sections, and fields for inclusion in said particular document and said user selected sequence of said sections, sub-sections, and fields said selected for inclusion in said particular document.

8. (original) The method as recited in Claim 1 further comprising the steps of:

f) displaying a list comprising outputting formats for said particular document for selection by said user; and

g) building said particular document, subsequent to receiving said user selection of said outputting format.

9. (currently amended) The method as recited in Claim 1 wherein an additional content comprising additional subject matter different from said subject matter of said content first selected by said user may be included in said particular document, such that said particular document is comprised of multiple different subject matter.

10. (original) A computer system in a computer system network, said computer system comprising:

a bus;

a memory unit coupled to said bus; and

a processor coupled to said bus, said processor for executing a

method for generating a plurality of templates, wherein said templates are utilized in building user customizable documents, wherein said templates are comprising sections, sub-sections and fields, said method comprising the steps of:

- a) storing said plurality of templates;
- b) displaying a list comprising said plurality of templates for selection by a user;
- c) retrieving said selected template from said storage, subsequent to the receiving of a user selection of a template; and
- d) displaying to the user said selected template, wherein said selected template enables a user to select said sections, sub-sections and fields for inclusion in a particular document to be built, and said selected template enables a user to select the sequence of said sections, sub-sections, and fields in said particular document to be built.

11. (original) The computer system of Claim 10 wherein said step a) of said method for generating a plurality of templates further comprises the step of:

storing of content, said content selectable subject matter for inclusion in said customizable document.

12. (currently amended) The computer system of Claim ~~10~~11 wherein said step b) of said method for generating a plurality of templates further comprises the step of:

displaying lists comprising said content for selection by a user.

13. (currently amended) The computer system of Claim 10 wherein said step c) of said method for generating a plurality of templates further comprises the step of:

retrieving ~~said~~ selected content from said storage, subsequent to receiving of a user selection of content.

14. (currently amended) The computer system of Claim 10 wherein said step d) of said method for generating a plurality of templates further comprises the step of:

separately displaying to the user ~~said~~ selected content, wherein said selected content will comprise the subject matter of the sections, sub-sections and fields of said particular document to be built.

15. (currently amended) The computer system of Claim 10 wherein said sections, sub-sections, and fields of said selected template are relative to said subject matter of ~~said~~ selected content.

16. (original) The computer system of Claim 10 wherein said method for generating a plurality of templates further comprises the step of:

e) displaying to said user a new template reflective of said user selections regarding said inclusion and said sequence of said sections, sub-sections, and fields of said particular document, subsequent to receiving said user selected sections, sub-sections, and fields for inclusion in said

particular document and said user selected sequence of said sections, sub-sections, and fields said selected for inclusion in said particular document.

17. (original) The computer system of Claim 10 wherein said method for generating a plurality of templates further comprises the steps of:

f) displaying a list comprising outputting formats for said particular document for selection by said user; and

g) building said particular document, subsequent to receiving said user selection of said outputting format.

18. (currently amended) The computer system of Claim ~~10~~11 wherein additional content comprising additional subject matter different from said subject matter of said content first selected by said user may be included in said particular document, such that said particular document may be comprised of multiple different subject matter.

19. (original) A computer readable medium for storing computer implemented instructions, said instructions for causing a computer system to perform the steps of:

a) storing said plurality of templates;

b) displaying a list comprising said plurality of templates for selection by a user;

c) retrieving said selected template from said storage, subsequent to the receiving of a user selection of a template; and

d) displaying to the user said selected template, wherein said selected template enables a user to select said sections, sub-sections and fields for inclusion in a particular document to

be built, and said selected template enables a user to select the sequence of said sections, sub-sections, and fields in said particular document to be built.

20. (original) The computer readable medium of Claim 19 wherein said computer implemented instructions causes a computer system to perform the step of:

storing of content, said content selectable subject matter for inclusion in said customizable document.

21. (currently amended) The computer readable medium of Claim ~~19~~20 wherein said computer implemented instructions causes a computer system to perform the step of:

displaying lists comprising said content for selection by a user .

22. (currently amended) The computer readable medium of Claim 19 wherein said computer implemented instructions causes a computer system to perform the step of:

retrieving ~~said~~ selected content from said storage, subsequent to receiving of a user selection of content.

23. (currently amended) The computer readable medium of Claim 19 wherein said computer implemented instructions causes a computer system to perform the step of:

separately displaying to the user ~~said~~ selected content, wherein said selected content will comprise the subject matter of the sections, sub-sections and fields of said particular document to be built.

24. (currently amended) The computer readable medium of Claim ~~19~~ 23 wherein said sections, sub-sections, and fields of said selected template are relative to said subject matter of ~~said~~ selected content.

25. (original) The computer readable medium of Claim 19 wherein said computer implemented instructions causes a computer system to perform the step of:

e) displaying to said user a new template reflective of said user selections regarding said inclusion and said sequence of said sections, sub-sections, and fields of said particular document, subsequent to receiving said user selected sections, sub-sections, and fields for inclusion in said particular document and said user selected sequence of said sections, sub-sections, and fields said selected for inclusion in said particular document.

26. (original) The computer readable medium of Claim 19 wherein said computer implemented instructions causes a computer system to perform the step of:

f) displaying a list comprising outputting formats for said particular document for selection by said user; and

g) building said particular document, subsequent to receiving said user selection of said outputting format.

27. (currently amended) The computer readable medium of Claim ~~19~~ 20 wherein additional content comprising additional subject matter different from said subject matter of said content first selected by said user may be included in said particular document, such that said particular document may be comprised of multiple different subject matter.

28. (original) A system for generating a plurality of templates, wherein said templates are utilized in building user customizable documents, wherein said templates are comprising sections, sub-sections and fields, said system comprising:

means for storing said plurality of templates;

means for displaying a list comprising said plurality of templates for selection by a user;

means for retrieving said selected template from said storage,

subsequent to the receiving of a user selection of a template; and

means for displaying to the user said selected template, wherein said selected template enables a user to select said sections, sub-sections and fields for inclusion in a particular document to be built, said selected template enables a user to select the sequence of said sections, sub-sections, and fields in said particular document to be built.

29. (original) The system of Claim 28 comprising:

means for storing of content, said content selectable subject matter for inclusion in said customizable document.

30. (currently amended) The system of Claim ~~28~~29 comprising:

means for displaying lists comprising said content for selection by a user.

31. (currently amended) The system of Claim 28 comprising:

means for retrieving ~~said~~ selected content from said storage, subsequent to receiving of a user selection of content.

32. (currently amended) The system of Claim 28 comprising:

means for separately displaying to the user said selected content, wherein said selected content will comprise the subject matter of the sections, sub-sections and fields of said particular document to be built.

33. (currently amended) The system of Claim 28 wherein said sections, sub-sections, and fields of said selected template are relative to said subject matter of said selected content.

34. (original) The system of Claim 28 comprises:

means for displaying to said user a new template reflective of said user selections regarding said inclusion and said sequence of said sections, sub-sections, and fields of said particular document, subsequent to receiving said user selected sections, sub-sections, and fields for inclusion in said particular document and said user selected sequence of said sections, sub-sections, and fields said selected for inclusion in said particular document.

35. (original) The system of Claim 28 comprising:

means for displaying a list comprising outputting formats for said particular document for selection by said user; and

means for building said particular document, subsequent to receiving said user selection of said outputting format.

36. (currently amended) The system of Claim ~~28~~29 wherein an additional content comprising additional subject matter different from said subject matter of said content first selected by said user may be included in said particular document, such that said particular document may be comprised of multiple different subject matter.
